My Projects

CORE SKILLS

AI Engineering

RAG (document ingestion, chunking, embeddings, vector retrieval), LLM Integration, Prompt Engineering, Semantic Kernel, Azure OpenAI, Model Context Protocol (MCP), AI Agents, Generative AI

Backend

Java 17, Java EE, Spring Boot, Spring Cloud, Spring Security, REST APIs, Microservices, Node.js, Python, FastAPI, PHP, OpenAPI 3, OpenFeign, OAuth2, JUnit 5, Mockito, MockMvc, Liquibase

Frontend

React, Next.js (App Router), React Native, Expo, Redux, TanStack Query, Vue.js 3, TypeScript, JavaScript, Pinia, Vue Router, Axios, Vite, HTML5, CSS3, jQuery, Vuetify, Design Systems, Flutter, Electron.js

Data & Search

PostgreSQL, Elasticsearch, MySQL, Oracle, DB2 9, SQLite, Relational Database Design, Multi-tenant Data Modeling, SQL Query Optimization

Cloud & DevOps

Google Cloud Platform (GKE, Pub/Sub, Cloud SQL, Cloud Storage, IAM), AWS (EC2, S3, RDS, Lambda, IAM), Azure (App Service, Blob Storage, Azure SQL, Functions, Entra ID), Docker, Kubernetes, CI/CD, Git, GitHub Actions

Practices

Software Architecture, System Design, Event-Driven Architecture, Clean Architecture, Code Review, Mentoring, Agile, Scrum, Performance Optimization, Automated Testing (Vitest, React Testing Library, Playwright), AI-Assisted Development (GitHub Copilot, Claude Code, Cursor, Codex)

SUMMARY

Senior Software Engineer with 20+ years of experience designing, building, and maintaining enterprise applications using Java, Spring Boot, REST APIs, Microservices and cloud-native architectures on Google Cloud Platform, AWS and Azure.

Hands-on experience building end-to-end RAG systems in Python: document ingestion, chunking, embedding generation, vector search, and context orchestration for grounded, citation-backed LLM answers.

Experienced across backend and full-stack development with React, React Native, Vue.js 3, TypeScript, Node.js, relational databases and distributed systems.

Strong background in software architecture, API design, system integration, performance optimization and delivering scalable solutions throughout the entire SDLC.

Experienced in AI-assisted development (GitHub Copilot, Claude Code, Cursor, Codex) and in designing LLM-powered features with retrieval and prompt design.

EXPERIENCE

Full Stack Engineer | BairesDev

(MAY 2021 - JUL 2026)

Remote

- Built and maintained a multi-tenant Orders microservice (Java 17, Spring Boot) for a retail e-commerce platform — order lifecycle, payments, fulfillment, and store operations.
- Designed contract-first REST APIs with OpenAPI 3, generating Spring interfaces and TypeScript clients for consuming services.
- Implemented event-driven integrations with Google Cloud Pub/Sub (order ingestion, payment updates, POS export results, supplier fulfillment, outbound email).
- Modeled multi-tenant PostgreSQL schemas and Liquibase migrations (orders, transactions, shipments, soft deletes).
- Delivered Elasticsearch-backed order search with indexing, search templates, filters, and aggregations.
- Designed and implemented an end-to-end RAG architecture in Python: document ingestion, chunking, embedding generation, vector search, and context assembly for LLM-grounded answers.
- Deployed and integrated services on Google Cloud Platform — GKE, Pub/Sub, Cloud SQL, Cloud Storage, IAM — with OpenFeign between microservices and OAuth2 via shared security base.
- Built frontend features across React, React Native, and Vue 3 — TypeScript, Redux, TanStack Query, Pinia, Vue Router, Axios, Vite, and Expo (Composition API with script setup on Vue).
- Wrote automated tests across the stack — JUnit 5, Mockito, and MockMvc on the backend; Vitest, React Testing Library, and Playwright on the frontend.
- Participated in Agile ceremonies, code reviews, and production support.

LANGUAGES

Portuguese – Native

English – C1 (Professional Working Proficiency)

Arabic – Elementary

CERTIFICATIONS

- Oracle Certified Professional, Java EE 5 Web Component Developer
- Oracle Certified Professional, Java SE 6 Programmer
- IBM Certified Associate Developer – Lotus Notes and Domino 7
- IBM Certified Database Associate – DB2 9 Fundamentals
- SUN Certified Mobile Application Developer

Solutions Architect | Lume Tecnologia

(FEB 2008 – APR 2021)

Pinhais, PR – Brazil

- Led software architecture decisions for enterprise applications and translated customer requirements into technical solutions.
- Designed backend systems using Java and Spring Boot and modernized legacy Java EE applications.
- Delivered cloud-hosted solutions on AWS (EC2, S3, RDS, Lambda, IAM) and Azure (App Service, Blob Storage, Azure SQL, Functions, Entra ID).
- Mentored developers, reviewed code quality and delivered solutions using React, React Native, Vue.js, Flutter, PostgreSQL and Git.

Java Teacher | Faculdades ESEEI

(FEB 2011 – DEC 2011)

Instructor for PC60 – Java/Web Programming and PC50 – Java Programming.

EDUCATION

Master in Health Technology (PPGTS)

(2007 – 2009)

Pontifícia Universidade Católica do Paraná (PUCPR)

Ontology, Ontology Learning, Java.

Bachelor of Information Systems

(2001 – 2004)

Pontifícia Universidade Católica do Paraná (PUCPR)

OTHER EXPERIENCE (PREVIOUS ROLES)

Java Specialist	Java Specialist	Java Specialist	Java Developer
GVT	Vivo	Visionnaire	HSBC
2007 – 2008	2005 – 2007	2004 – 2005	2003 – 2004
